## 2025 Annual Report

Fiscal year 2025 (October 2024-September 2025)

Our Mission: Helping People

**Gary Bemby**  
Chairman of the Board of Directors  
LifeView Group

**Allison Hill**  
President and CEO  
LifeView Group

At LifeView Group, we remain committed to our mission of “helping people.” Each year brings new opportunities to grow, improve and adapt—and 2025 has been no exception. Thanks to the dedication of our team members, we’ve made meaningful progress guided by our five strategic priorities:

- **Focus on team:** We are proud to be recognized as a 2026 Military Friendly® Employer and a 2025 VETS Indexes 4-Star Employer. These honors, along with being ranked #7 on the Top 100 Women-Led Businesses in Florida, reflect our commitment to building a strong, diverse and supportive workplace for all team members.
- **Drive consistent quality:** Our programs earned the highest level of accreditation from CARF International, a testament to the accountability and excellence of our services.
- **Excel at service delivery:** We are thoughtfully assessing and planning for the future of our campus spaces, ensuring they remain accessible, client-focused and responsive to the needs of our community.
- **Ensure financial health:** Our team remains committed to balancing a diverse set of priorities, including managing operating costs, supporting compensation growth, and replacing essential vehicles and systems. Through strategic expansion via new contracts and programs, we are enhancing our capacity to serve evolving community needs while ensuring the long-term sustainability of our mission.
- **Be the trusted partner:** Recognition from our community and industry partners via awards and new business contracts underscores the trust placed in us. LifeView Group is committed to continuing these valued relationships in support of those we serve.

These achievements highlight just a few of the ways we’re living out our mission of “helping people.” None of this would be possible without the dedication of our 2,700 team members, the trust of our community and the ongoing support of our partners.

Thank you for being part of this journey with us. We look forward to the year ahead, continuing our journey of growth and service together.

Sincerely,

Gary Bemby  
Chairman of the Board of Directors,  
LifeView Group

Allison Hill  
President and CEO,  
LifeView Group

## Mission

Helping people

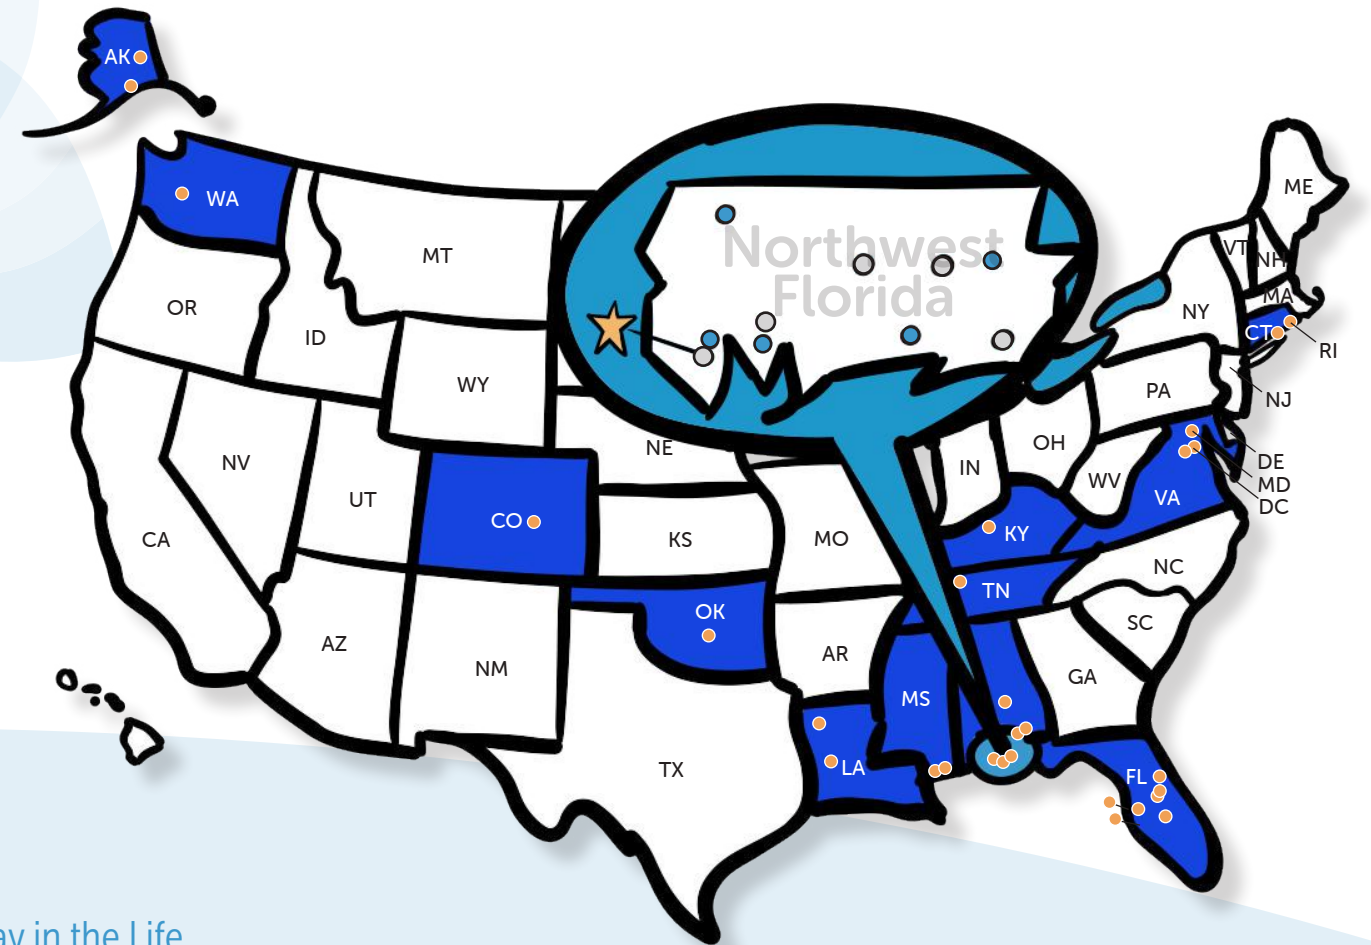

## Vision

Be the trusted partner

## Values

Treat people right | Take care of each other | Never settle

LifeView Group is a nonprofit family of companies that includes Lakeview Center’s behavioral health care, FamiliesFirst Network’s child protection services and Global Connections to Employment’s career services for people with disabilities. United under one mission of “helping people,” our 2,700 team members impact lives in 14 states and Washington, D.C. - serving others through some of their most vulnerable moments.

### Day in the Life

Across LifeView Group, our Day in the Life initiative gives leaders the opportunity to step into different roles across the organization, building empathy, deepening understanding and strengthening connections between teams – fostering a more connected, informed and supportive workplace.

Shown here, Lynne Whittington, director of system improvement and supports at FamiliesFirst Network, spent the day shadowing Desiree at Lakeview Center’s Specialized Therapeutic Foster Care Program, which is designed for children and youth with significant emotional, behavioral or mental health needs.

Lakeview Center is Northwest Florida's most comprehensive behavioral health care provider, with services for adults and children spanning 60+ programs from Escambia to Walton County, including residential programs, outpatient services, crisis treatment and community-based programs.

### Mental health crisis care

In April 2025, Lakeview Center celebrated one year of serving as the adult Central Receiving Facility for Escambia and Santa Rosa Counties. In this first year, Lakeview Center performed 3,908 Baker Act screenings, illustrating the true need for specialized crisis care. The majority of those screened also chose to receive follow-up care at Lakeview Center – meaning we are connecting people to much-needed treatment who otherwise may have gone without.

Access to crisis mental health care is essential to our entire community. With Lakeview's Central Receiving Facility, patients have faster access to the best level of care for them. Fewer adults go to hospital emergency rooms. Rather than spending hours waiting in a hospital emergency room, our law enforcement partners can return to patrol faster, with an average drop-off time of just 11 minutes at Lakeview's Central Receiving Facility. Plus, we all benefit from healthier neighbors, friends and family members.

### Expanding access to services

Lakeview Center's Central Access program offers a thorough screening process, connecting clients with the program that best meets their needs. This may include counseling, psychiatry or a range of specialized programs.

**3,008**  
people in mental health crisis served through our Mobile Response Team, including:  
**1,193 children**

With this streamlined approach, Lakeview Center's Central Access program ensures convenient access to care, so more adults, children and families can receive the mental health services they need.

### Support for veterans

In November 2024, Lakeview Center launched a partnership with Home Base, a leading nonprofit organization working to heal invisible wounds and combat veteran suicides, while eliminating barriers to care and enhancing the quality

of support. Through comprehensive, innovative programs and evidence-based, world-class clinical care, Home Base aims to improve the lives of those affected by military service-related trauma through the launch of an outpatient clinic in partnership with Lakeview Center.

With more than six military installations in Northwest Florida – including Naval Air Station Pensacola, Naval Air Station Whiting Field, Eglin Air Force Base, Hurlburt Field, Tyndall Air Force Base and Naval Support Activity Panama City – more than 39,000 active-duty military live in our region, and veterans represent 12% of our area workforce, twice the average US rate.

**29,458**  
people served  
**24%**  
who were children

**3,908**  
people experiencing a mental health crisis underwent a Baker Act screening in our new Central Receiving Facility.

Through Lakeview Center's collaboration with Home Base, outpatient clinical care is available at no cost for veterans and military families for a variety of behavioral health needs including post-traumatic stress, depression, anxiety, anger, grief and loss and co-occurring substance use issues. Lakeview provides outpatient counseling, psychiatry, medication management and case management to veterans and their families referred by Home Base.

As a Home Base Florida partner clinic, Lakeview Center team members received extensive training in evidence-based therapies and military-informed care from clinical experts at Massachusetts General Hospital. This specialized, holistic model is tailored to meet the needs of veterans and their family members.

### Community partnerships

#### Lakeview Center leaders serve on opioid abatement advisory boards

As part of our vision to "be the trusted partner," Lakeview Center continues to collaborate with other organizations across the region. Lakeview Center leaders have been selected to serve on the Opioid Abatement Funding Advisory Boards for both Walton and Escambia County, working with local partners to address the opioid crisis, grow prevention services and build healthier communities.

#### Lakeview Center teams with Escambia sheriff's office on co-responder program

After working closely for years with local law enforcement on crisis intervention training, Lakeview Center expanded services to include a co-responder program for mental health-related calls with the Escambia County Sheriff's Office. The goal of this program is to connect community members with the care they need quickly while avoiding unnecessary incarcerations and promoting safety for citizens and law enforcement.

Out of the 671 people served by our co-responder program in FY25, more than 70% were able to be diverted from incarceration and hospitalization, and 16% of those served were children.

#### Lakeview Center awarded grant to grow the next generation of behavioral health professionals

In 2024, Lakeview Center received a \$320,000 mental wellbeing grant from the Florida Blue Foundation to be distributed over four years. Thanks to this support, a new, dedicated internship coordinator is focused on strengthening our behavioral health workforce pipeline through expanded internship opportunities and outreach to educational institutions. This initiative is helping address the growing demand for professionals in counseling, social work and nursing.

**\$5 million**  
in charity care

**50**  
new clients each day

**54,135**  
calls handled by our Central Client Registration

Since the grant's inception, we have enrolled 53 student interns—10 in counseling, 16 in social work and 27 in nursing (including APRNs)—who have collectively reported over 6,400 internship hours. We've already hired 10 interns into full-time roles, with more expected as students complete their programs. Lakeview Center is proudly building a strong foundation for the future of behavioral health care.

## Mental Health Task Force of Northwest Florida

Lakeview Center has been an active member of the regional Mental Health Task Force, led by Rep. Michelle Salzman, since its inception. Through dedicated teamwork and community partnerships, the Task Force has advanced key strategic initiatives and is now collaborating to identify new opportunities to strengthen mental health services across Northwest Florida.

## Meditation Garden and Labyrinth unveiled at Lakeview Center

A new Meditation Garden has opened at Lakeview Center's main campus in downtown Pensacola, offering clients, families, visitors and team members a peaceful outdoor space to support healing and mental well-being.

Thanks to generous support from NAMI Emerald Coast and the Ladybug Garden Club of Pensacola, the Meditation Garden creates a quiet, natural environment where individuals can find respite and reflection. The space is designed to incorporate the calming effects of nature and the benefits of mindfulness into daily routines.

Lakeview Center's Meditation Garden also includes a labyrinth – one of only a few in this region. Different from a maze, a labyrinth has a single, winding path to the center and back out, encouraging slow, intentional movement. Walking the path can help lower anxiety and stress levels, offering a physical way to quiet the mind and focus inward—an especially valuable practice for individuals in mental health or substance misuse treatment. Painting for the mural was led by local artist Daniel Andreu, with Lakeview Center team members and supporters coming out to help for a fun-filled painting day.

## From survivor to advocate: Alicia Tappan fights against human trafficking

Alicia Tappan, founder of Survivor-Led Solutions, has been a valued partner with Lakeview Center through her work on the organization's Human Trafficking Task Force and training events. She and her team have also donated hundreds of clothing and toiletry items – and helped organize these into a Resource Closet. The Resource Closet benefits people coming into Lakeview Center's crisis or residential units – some of whom have only the clothes on their backs and come to stay at Lakeview Center for weeks, even months at a time for treatment. She also leads empowerment groups for women at Road to Recovery, Lakeview Center's residential treatment program for substance misuse, plus training for foster care group homes and Meridian, our statewide inpatient psychiatric program.

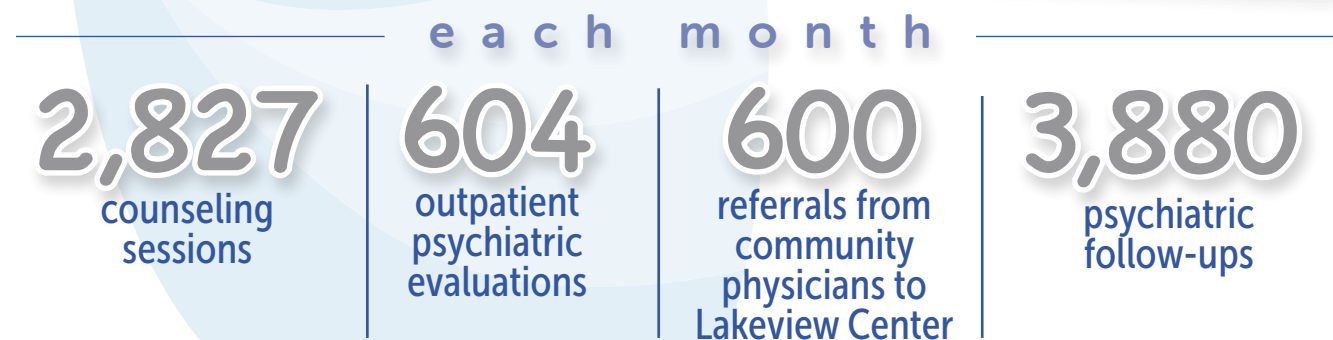

Landrum presented to Lakeview Center a \$17,300 donation – proceeds from the 2nd Annual Landrum 5K Run/Walk held in October of 2024. The 3rd Annual Landrum 5K was held in October 2025 and brought in even more sponsorship support to benefit mental health care at Lakeview Center.

Lakeview Center of Walton County was honored to present a plaque and heartfelt thanks to Destiny Worship Center, whose holiday generosity brightened the season for many – from Thanksgiving meals to Christmas gifts for children supported by our community-based care teams and the residential Women and Children's Center.

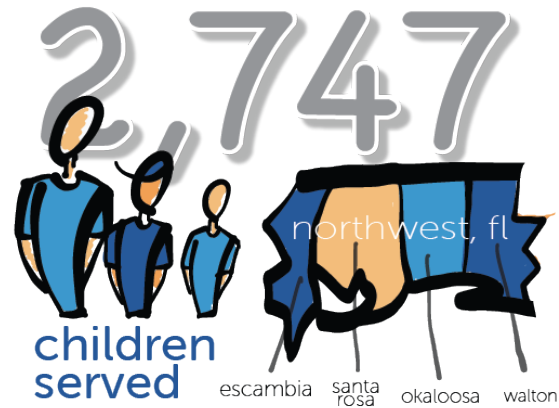

State Representative Patt Maney toured our main campus to see team members across our acute care service areas.

Lakeview Center President Shawn Salamida had the honor of presenting Rep. Michelle Salzman with the Community Impact Award during the University of West Florida Usha Kundu, MD College of Health 10th Anniversary celebration.

FamiliesFirst Network provides child protective services and case management in Escambia, Santa Rosa, Okaloosa and Walton counties. Our dedicated team works closely with kids and parents, offering support that helps keep families safely together whenever possible. When children must be placed in out-of-home foster care, we focus on helping families reunify in a safe and stable environment. For young adults transitioning out of foster care, FamiliesFirst Network provides services helping youth build independent, successful lives.

### Preventing child abuse

FamiliesFirst Network serves more than 2,700 children each year – including over 750 who are receiving specialized child abuse prevention services aimed at keeping families safely together and reducing the need for out-of-home placements. As a dedicated case management organization, we play a critical role in guiding families through challenges and fostering long-term resilience.

While foster care remains a vital component of the child protection system, more than one-quarter of our cases focus on prevention—working directly with families whose children remain in the home with their biological parents. This proactive approach reflects our commitment to preserving family unity and promoting safe, stable environments for children to thrive.

### Keeping families safely together

Research shows that removing a child from the home can be deeply traumatic. That's why our team focuses on addressing the root causes of family stress—such as poverty, illness, or job loss—before they escalate. When parents need support with essentials like food, housing, employment, transportation or life skills, our case managers develop personalized plans to help families stabilize and thrive.

Through initiatives like our Parent Advisory Council and customer satisfaction surveys, we actively engage families to improve services and empower them to overcome adversity.

As an affiliate of LifeView Group, we're uniquely positioned to connect families with a broad network of support. Whether it's behavioral health care through Lakeview Center or employment assistance through Global Connections to Employment (GCE), we help parents tackle core challenges like substance misuse or financial instability. These collaborative efforts are reflected in our rising reunification rates, as families gain the tools and support needed to succeed together.

Each year, FamiliesFirst Network helps thousands of Northwest Florida children find safety, stability and brighter futures – truly a regional, statewide and national leader in child protective services.

### 20th Annual Child Welfare Conference

FamiliesFirst Network proudly hosted its 20th Annual Child Welfare Conference, bringing together professionals, partners and community members for a day of learning, reflection and inspiration. The event featured dynamic speakers who explored the evolution of child protective services, current challenges and future opportunities to better serve children and families across Northwest Florida.

We extend our sincere thanks to Gateway Church of Christ for graciously hosting the event, and to our generous sponsors whose support made this milestone possible.

This annual gathering continues to serve as a cornerstone for collaboration, professional development and renewed commitment to improving outcomes for children in care.

### Expanding opportunities through strategic partnerships

FamiliesFirst Network received a generous grant from Selfless Love Foundation, reinforcing efforts to support children in foster care and youth transitioning into adulthood.

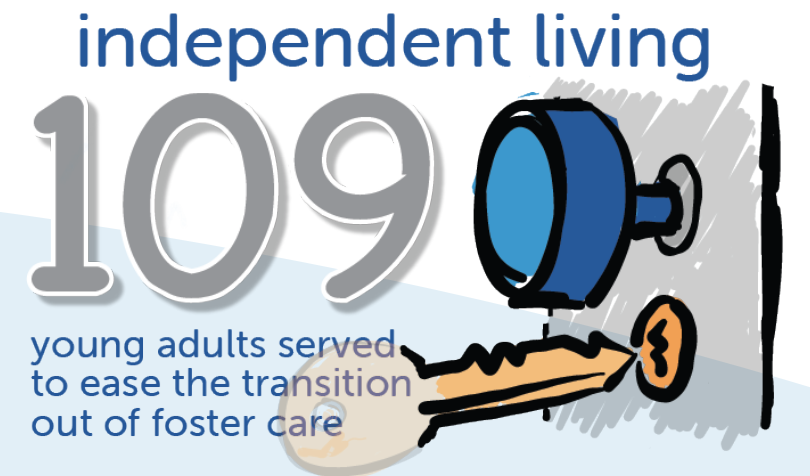

Since 2020, Selfless Love Foundation has been a valued partner in enhancing services for youth across Northwest Florida. Their continued investment helps expand outreach and improve support systems for young people in the foster care system.

Grant funding this year was used to provide critical resources for youth ages 18 to 21 through our Young Adult Services program. This initiative offers housing options, life skills development and individualized support to help young adults build stable, self-sufficient futures.

### Visitation space enhanced through community support

Generous support from Nemours Children's Specialty Care enhanced the visitation space at our Escambia County service center. Through the Nemours Cares Week initiative, the visitation space was transformed into a warm, welcoming environment designed to support meaningful family connections during supervised visits.

When a child is removed from their biological parent's home, reunification is the primary goal whenever possible. Visitation plays crucial role in that process, providing structured time for families to connect and build relationships. With improvements to our facilities, FamiliesFirst Network aims to make these moments more meaningful and comforting for the children and families we serve. A warm and inviting space helps establish routines and strengthen bonds that can continue after families are reunited.

In addition to helping improve our visitation space, Nemours donated clothing and established an onsite resource center to assist case managers and foster parents. These resources are especially valuable during emergency placements, when children often enter care with little notice and few personal belongings. Having essential items readily available helps ease the transition for both children and caregivers.

During the Easter season, Nemours also generously donated Easter baskets to children in foster care. These thoughtful gifts brought moments of joy and comfort to youth experiencing challenging transitions, helping them feel seen and supported during the holiday.

### Supporting academic success through community partnership

For the second consecutive year, All in Credit Union generously donated school supplies to support the children and families served by FamiliesFirst Network. This thoughtful contribution arrived at a critical time, helping families facing financial challenges prepare for the new school year and ensuring children in care have the tools they need to succeed in the classroom.

All in Credit Union's continued support reflects a strong commitment to community partnership and child well-being. Their donation directly benefits children in foster care and families receiving preventative services, helping to reduce stress and promote stability during a key transitional period.

### Jockey donates teddy bears to children entering foster care

Jockey Silver Sands Premium Outlets in Destin provided comfort and care to children entering foster care by donating snuggly teddy bears. These soft companions offer a sense of security and emotional support during what is often a frightening and uncertain time for children experiencing removal from their homes.

The donation is part of Jockey's continued commitment to supporting vulnerable children and families. By helping create moments of comfort during crisis, Jockey's contribution reinforces the importance of community partnerships in promoting safety, stability and healing.

### Easter basket donation from Pensacola Catholic High School

FamiliesFirst Network is proud to recognize the Pensacola Catholic High School National Honor Society for their generous donation of more than 80 Easter baskets for children in foster care and those receiving mental health services through Lakeview Center. This marks a meaningful contribution that brought joy and comfort to vulnerable children during the spring season.

These thoughtfully assembled baskets provided a moment of celebration and normalcy for children navigating difficult circumstances. The students' compassion and dedication serve as a powerful reminder that small acts of kindness can have a lasting impact.

### Annual Spring Fling made possible by volunteers, team members and community partners

In April 2025, FamiliesFirst Network hosted our annual Spring Fling in Pensacola, welcoming families from across the community for a day of fun, connection and celebration. This free, family-friendly event featured Easter egg hunts tailored to different age groups, along with crafts, games and delicious food. From toddlers to tweens, children enjoyed the excitement of the hunt while parents connected with team members and volunteers who made the event possible.

The Spring Fling reflects FamiliesFirst Network's commitment to creating positive experiences for children and families in Northwest Florida. Events like these not only bring joy but also strengthen community bonds and highlight the organization's ongoing dedication to supporting families in meaningful ways. A heartfelt thank you goes out to all team members, volunteers, donors and community partners whose hard work made the day a success.

FamiliesFirst Network received the national Adoption Excellence Award by the U.S. Department of Health and Human Services Children's Bureau. This award recognizes our team's exceptional commitment and innovative efforts connecting children in the foster care system with loving, permanent families. The award was presented at an event in Washington, D.C., in November 2024. Award winners are organizations that demonstrate outstanding achievements in adoption and child protective services, with a focus on effective recruitment strategies, family engagement and successful outcomes for children in foster care.

### Parent with Lived Experience Leadership Award

Raised in a household where both parents struggled with addiction, Ashley Jackson was exposed to abuse and instability from a young age. When she became a mother herself, the demands of parenting a special needs child combined with her own medical issues brought Ashley to FamiliesFirst Network.

Ashley now serves on our Parental Advisory Council, mentoring others and advocating for families in need. In the summer of 2025, she was honored with the Parent with Lived Experience Leadership Award by the Florida Coalition for Children — an amazing statewide honor recognizing her inspiring journey.

Global Connections to Employment (GCE) provides jobs and training for people with significant disabilities. As one of the country's largest private employers of persons with disabilities, GCE works with customers from the U.S. military, commercial businesses and community partners – as well as federal, state and local governments. Our 1,700 team members serve in contracts across 14 states plus Washington, D.C.

Each year, the GCE team collaborates with partners across the country to improve employment opportunities and grow our lines of business, which include:

- Business services
- Contact center services
- Custodial and health care environmental services
- Facilities management
- Food services
- IT services
- Employment and support services

### Business growth

FY25 saw the launch of several new contracts:

- In the fall of 2024, our custodial services contract launched at Maxwell Air Force Base in Alabama, adding approximately 77 jobs.
- In 2025, GCE expanded custodial services into the hospitality sector by launching a new contract at Joint Base Elmendorf-Richardson Lodging in Anchorage, Alaska—paving the way for future opportunities in similar settings.
- Also in 2025, our team launched GCE Designs, a new line of business offering branded apparel, embroidery and promotional items. GCE Designs is set to open a physical location in Pensacola, Florida, in spring 2026 and will serve customers nationwide through our network of nonprofit partners.

GCE's custodial team at Maxwell Air Force Base in Alabama

GCE continues to grow into new lines of business to expand opportunities for people with disabilities. This year saw the expansion of our contact center services, marking a significant step in demonstrating GCE's ability to support complex government contracts with a variety of job opportunities for people with disabilities.

### Project SEARCH

May 2025 marked the first graduation for our newest Project SEARCH site on the campus of Santa Rosa Medical Center in Milton, Florida. Growing our Project SEARCH program means greater access to job training resources for young adults with disabilities.

Project SEARCH is a national program – operated by GCE in Northwest Florida since 2007 – helping young adults with disabilities transition to employment over the course of a school year. Interns gain hands-on experience and develop valuable skills that help prepare them for future employment. The latest Project SEARCH site is a collaboration between GCE,

Santa Rosa Medical Center, Santa Rosa County District Schools and Vocational Rehabilitation. This represents GCE's fifth Project SEARCH site in Northwest Florida.

Nationally, the unemployment rate for people with disabilities continues to be more than double the rate for those without disabilities. However, Project SEARCH graduates maintain employment at a rate of 90%—staying on the job for at least 180 days.

### Recognized for quality

GCE continued to receive national recognition in FY25 for our commitment to quality service.

- GCE achieved **ISO 9001:2015 certification by NQA**. This milestone underscores GCE's unwavering dedication to operational excellence, as well as the ability of people with disabilities to exceed customer expectations. ISO 9001:2015 is the world's most widely recognized standard for quality management systems. Achieving ISO 9001:2015 certification reflects GCE's focus on delivering exceptional service, maintaining rigorous quality standards and continuously improving operations to better serve customers, team members and the community.
- GCE earned the **Contact Center Site Certification from the International Customer Management Institute (ICMI)**, demonstrating our commitment to operational excellence and customer service. The certified team operates GCE's Colorado Military Health System contact center at Fort Carson, providing patient appointment and nurse telehealth services since 2023. GCE contact centers deliver customer-focused solutions such as tiered support, scheduling, IT help desks and business process outsourcing – all in mission-driven environments.
- GCE achieved two-year renewal of our **CIMS-GB with Honors Certification**. GCE has maintained this voluntary recognition since 2012, demonstrating commitment to sustainable, high-quality custodial operations.
- GCE's Naval Station Newport, Rhode Island, team earned its 14th **five-star accreditation** for excellence in U.S. Navy food services.
- GCE was named **Tennessee Employer of the Year** for 2024. Our custodial team at Fort Campbell was selected as winner for Tennessee Region 5 by Vocational Rehabilitation and Department of Human Services. This award especially highlights GCE's recruiting and outreach efforts for people with disabilities in Tennessee.

### Industry partnerships

GCE's partner Cherokee Federal was chosen for the 2025 Business Partnership Award by SourceAmerica because of collaboration with GCE at Fort Carson, Colorado. This full-service patient appointment contact center enables beneficiaries and members of the military health system to find the right doctor and location that suits their needs.

This partnership has created sustainable employment opportunities across federal agencies for individuals with disabilities, while improving operational effectiveness.

## Advocating for people with disabilities

GCE advocates for systemic change by collaborating with federal, nonprofit and business sectors.

In September 2025, our team proudly participated in the SourceAmerica Grassroots Conference in Washington, D.C., an annual event that brings together advocates, nonprofit leaders and policymakers to promote disability-inclusive employment through the AbilityOne program. GCE team members engaged in meaningful discussions, shared personal stories and strengthened connections to advance opportunities for individuals with disabilities in the workforce.

Throughout the week, GCE representatives attended sessions and visited Capitol Hill to meet with congressional leaders. Pam Cox and Lacy Campen from GCE's custodial contract at the Armed Forces Retirement Home in D.C. shared their inspiring journeys. Both spoke about overcoming employment challenges, the life-changing impact of the AbilityOne program, and their career growth at GCE. Lacy also took the stage as a self-advocate, delivering a heartfelt message about the importance of work for her and her family—a moment that made us incredibly proud.

GCE hosted our annual Project SEARCH Reverse Job Fair on March 27 at the Lakeview Activity Center in Pensacola. The event connected local employers with our Project SEARCH interns—young adults with disabilities—who showcased their resumes, skills and employment goals. The reverse job fair provided a platform for interns to transition successfully into competitive employment after completing the program.

GCE's summer youth program consists of pre-employment transition services designed to help students between the ages of 14 and 21 prepare for modern-day careers. Students participate in a variety of work-based learning experiences to explore careers and learn about the many choices they can make after high school. In Pensacola, Florida, five of these students completed their activities at Escambia High School. Based out of the high school facilities department, students gained experience in power washing, waxing floors, cleaning, sweeping and moving large furniture safely.
